

10 Project Development + Accessibility/Inclusivity/  
Usability

---

# DESIGN SYSTEMS FOR DIGITAL PRODUCTS

---

Interaction Design II, Winter semester 2024

---

# EXTRA RESOURCES

---

This week we would like you to watch a short lecture on accessibility / inclusivity / and usability by Google Developers. Here is the link: <https://www.youtube.com/watch?v=TAzkrXTGEOM&t=143s>

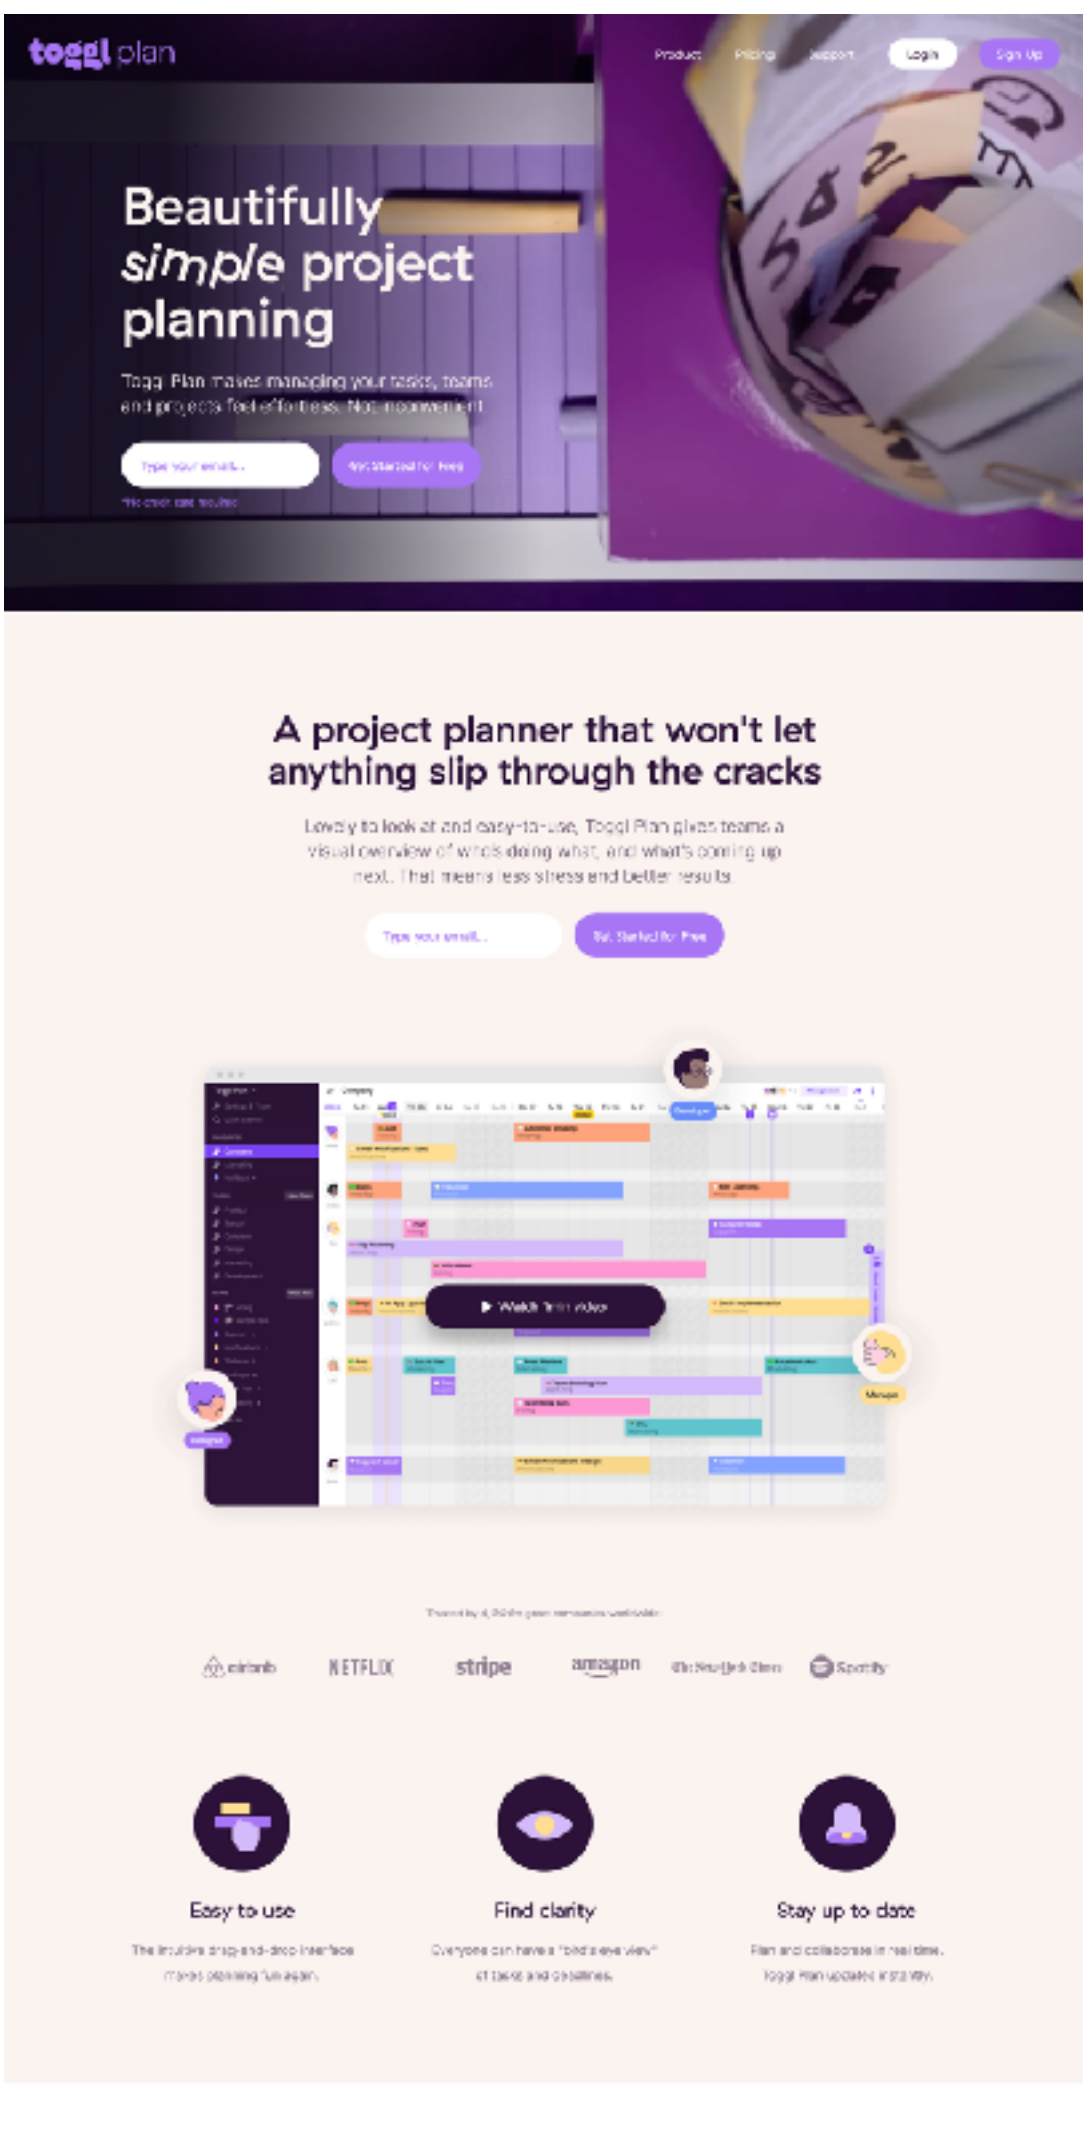

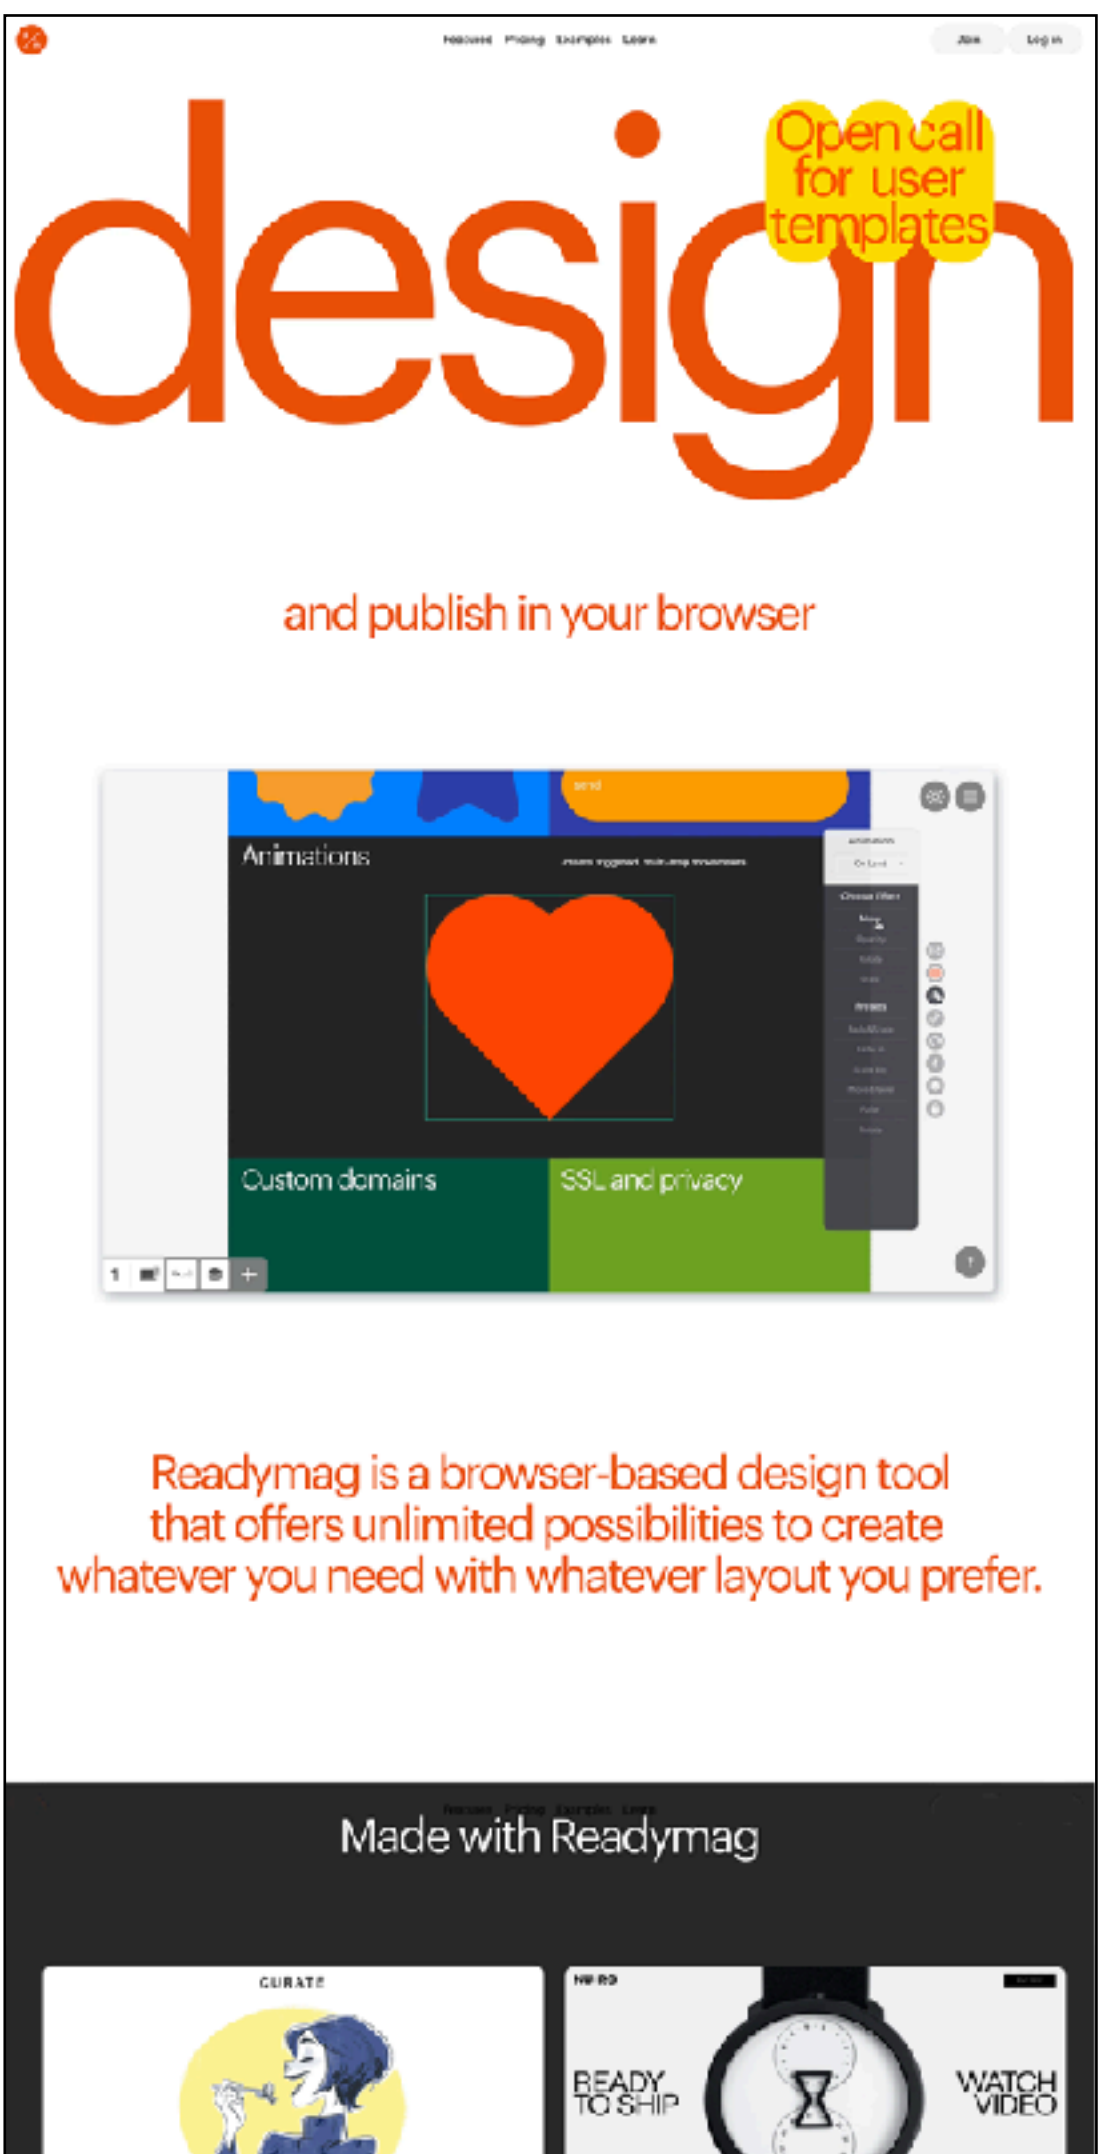

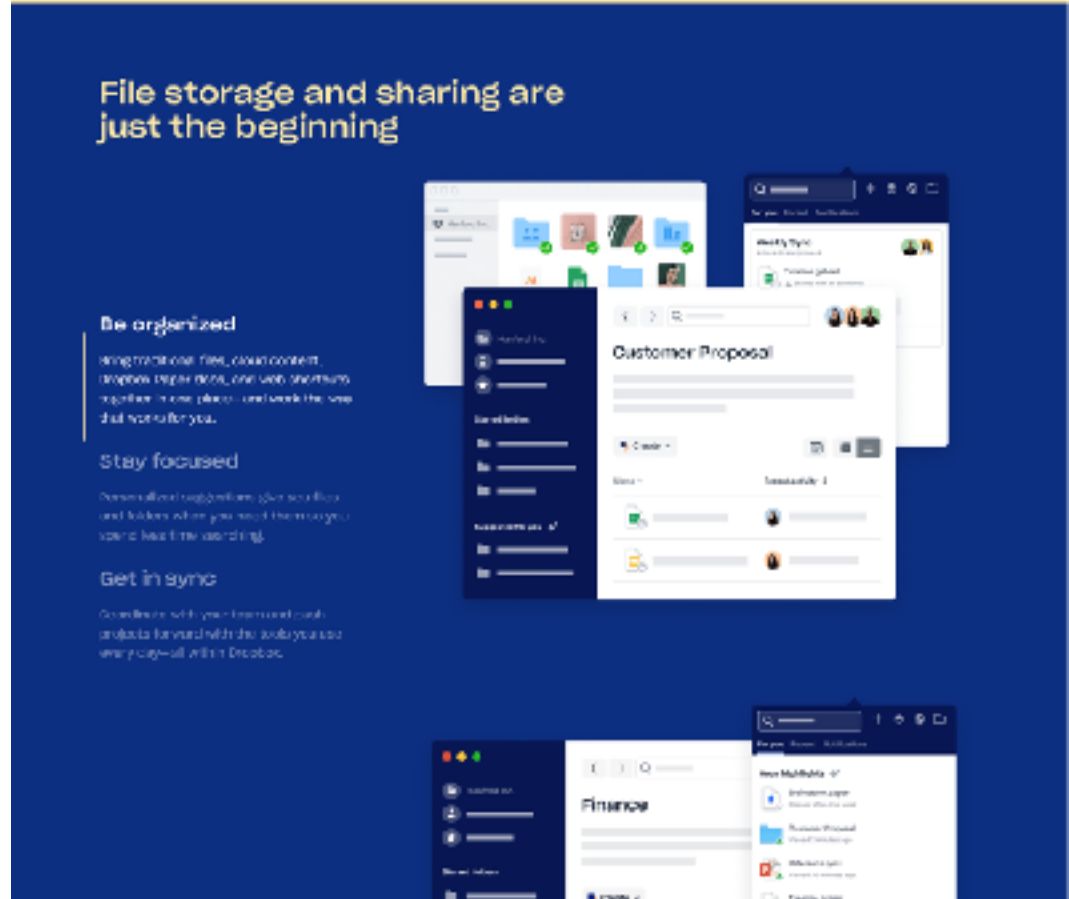

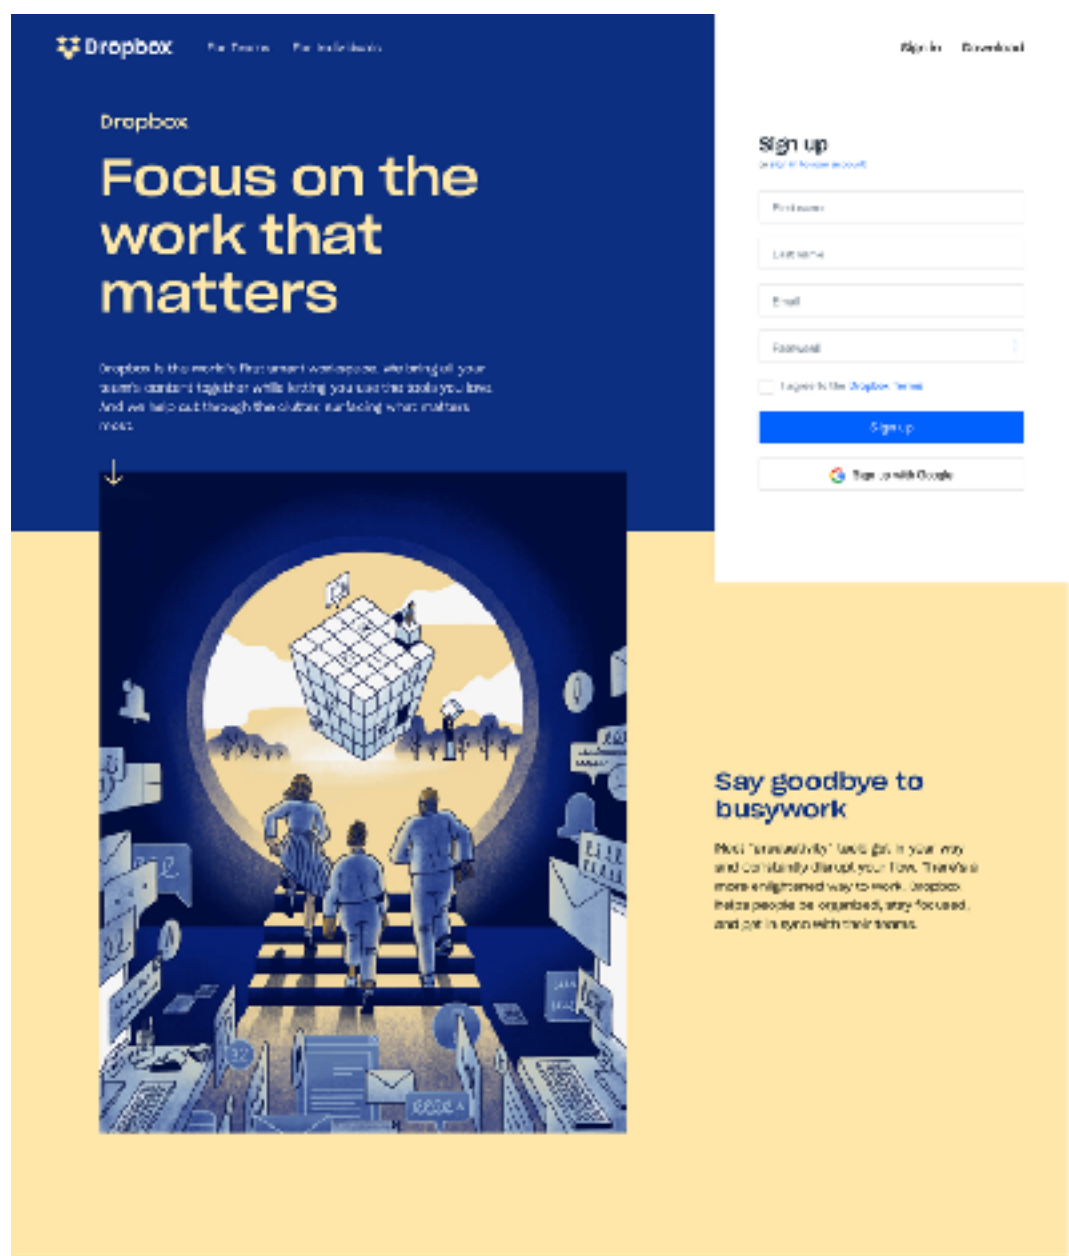

Think how you might increase accessibility in your web application. You might want to also understand about A.T. Assistive Technologies as it is important to understand how users use assistive technology for their web experience. It's very interesting and an important aspect for consideration in our design process... enjoy!

# Final submission

---

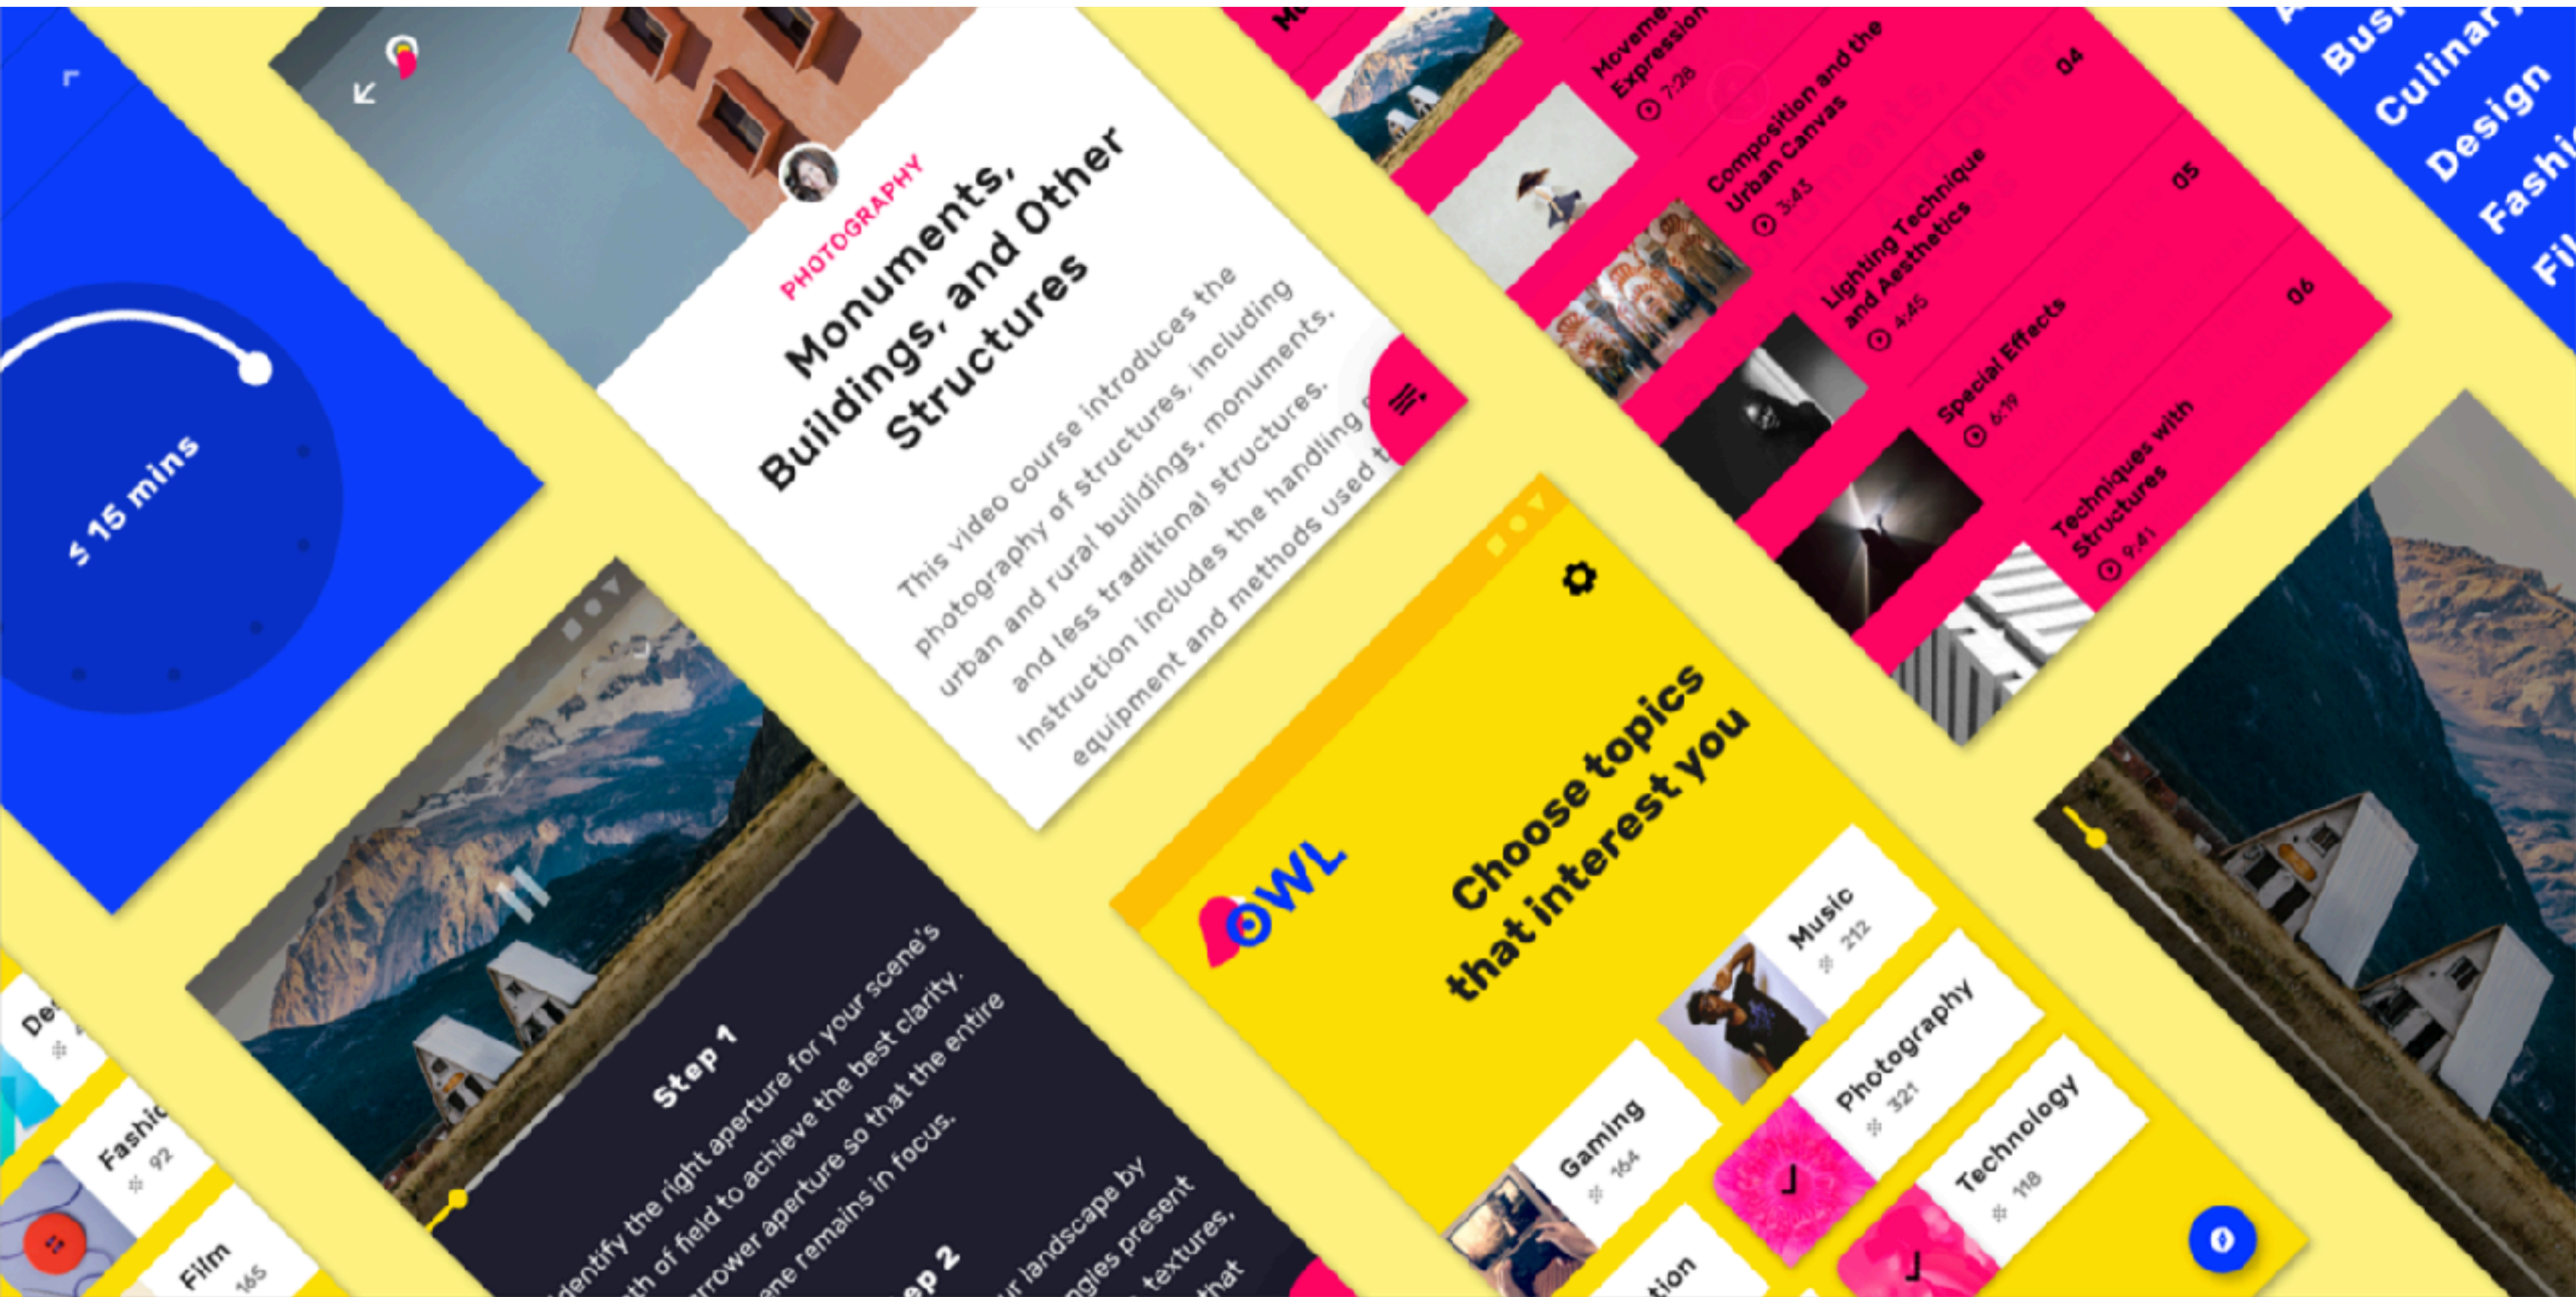

- Download the submission folder from the (CMS). Submit the below in the clearly labeled folders including **Figma file and jpegs** of all deliverables, and video file (mp4 or mov).
- Note: Style Guide, Stylescape, Responsive Dashboard and Function Pages should all be in **one** organized Figma file and all artboards/components should be labeled clearly
- **1. Animated Start Page and website functions video:** develop your midterm animated start page and add your other functions to provide a complete overview video of the website (bonus points for extra animation) (submit .mp4 or .mov and Figma file)
- **2. Style Guide** (include all elements in template provided in folder: submit Figma file and png)
- **3. Responsive Dashboard** (desktop 12 col, tablet 8 col, mobile 4 col sizes)
- **4. Function Pages (Function 1, 2, 3 (1 function per member of group))** One complete core function per group member (named), this should be minimum 3 pages (eg navigation, navigation, content) but may be more, complete all pages until the function is complete. All pages must be consistent with your style guide.
- **5. Stylescape** Final stylescape in Figma (should only contain what you actually use in your website)
- **6. Fonts** used must be included.
- **7. Archive Folder** (on CMS)

# Final submission: 1. Animated start page

## Final submission: 2. Style Guide in Figma + PNG

### 01 Project name

Enter here a small description about your project. Mention what the overall topic and purpose is, for whom you are designing and show the emotional aspect behind the concept, core features and the visual language.

## Final submission: 2. Style Guide: Student examples

### 01 EGYPTIAN CHEF

The EGYPTIAN CHEF is not just a cooking game platform, it is a complete website that aims to teach beginners, kids or foreigners the most famous Egyptian dishes through a fun easy and helpful game. The game consists of six levels that goes through different dynasties of Egypt. Using the chef cat and customizing it through each level learning how to cook becomes easy and super fun.

We make cooking a lot more fun and easier than it seems!

Here are the details.

### 02 CORE FEATURES

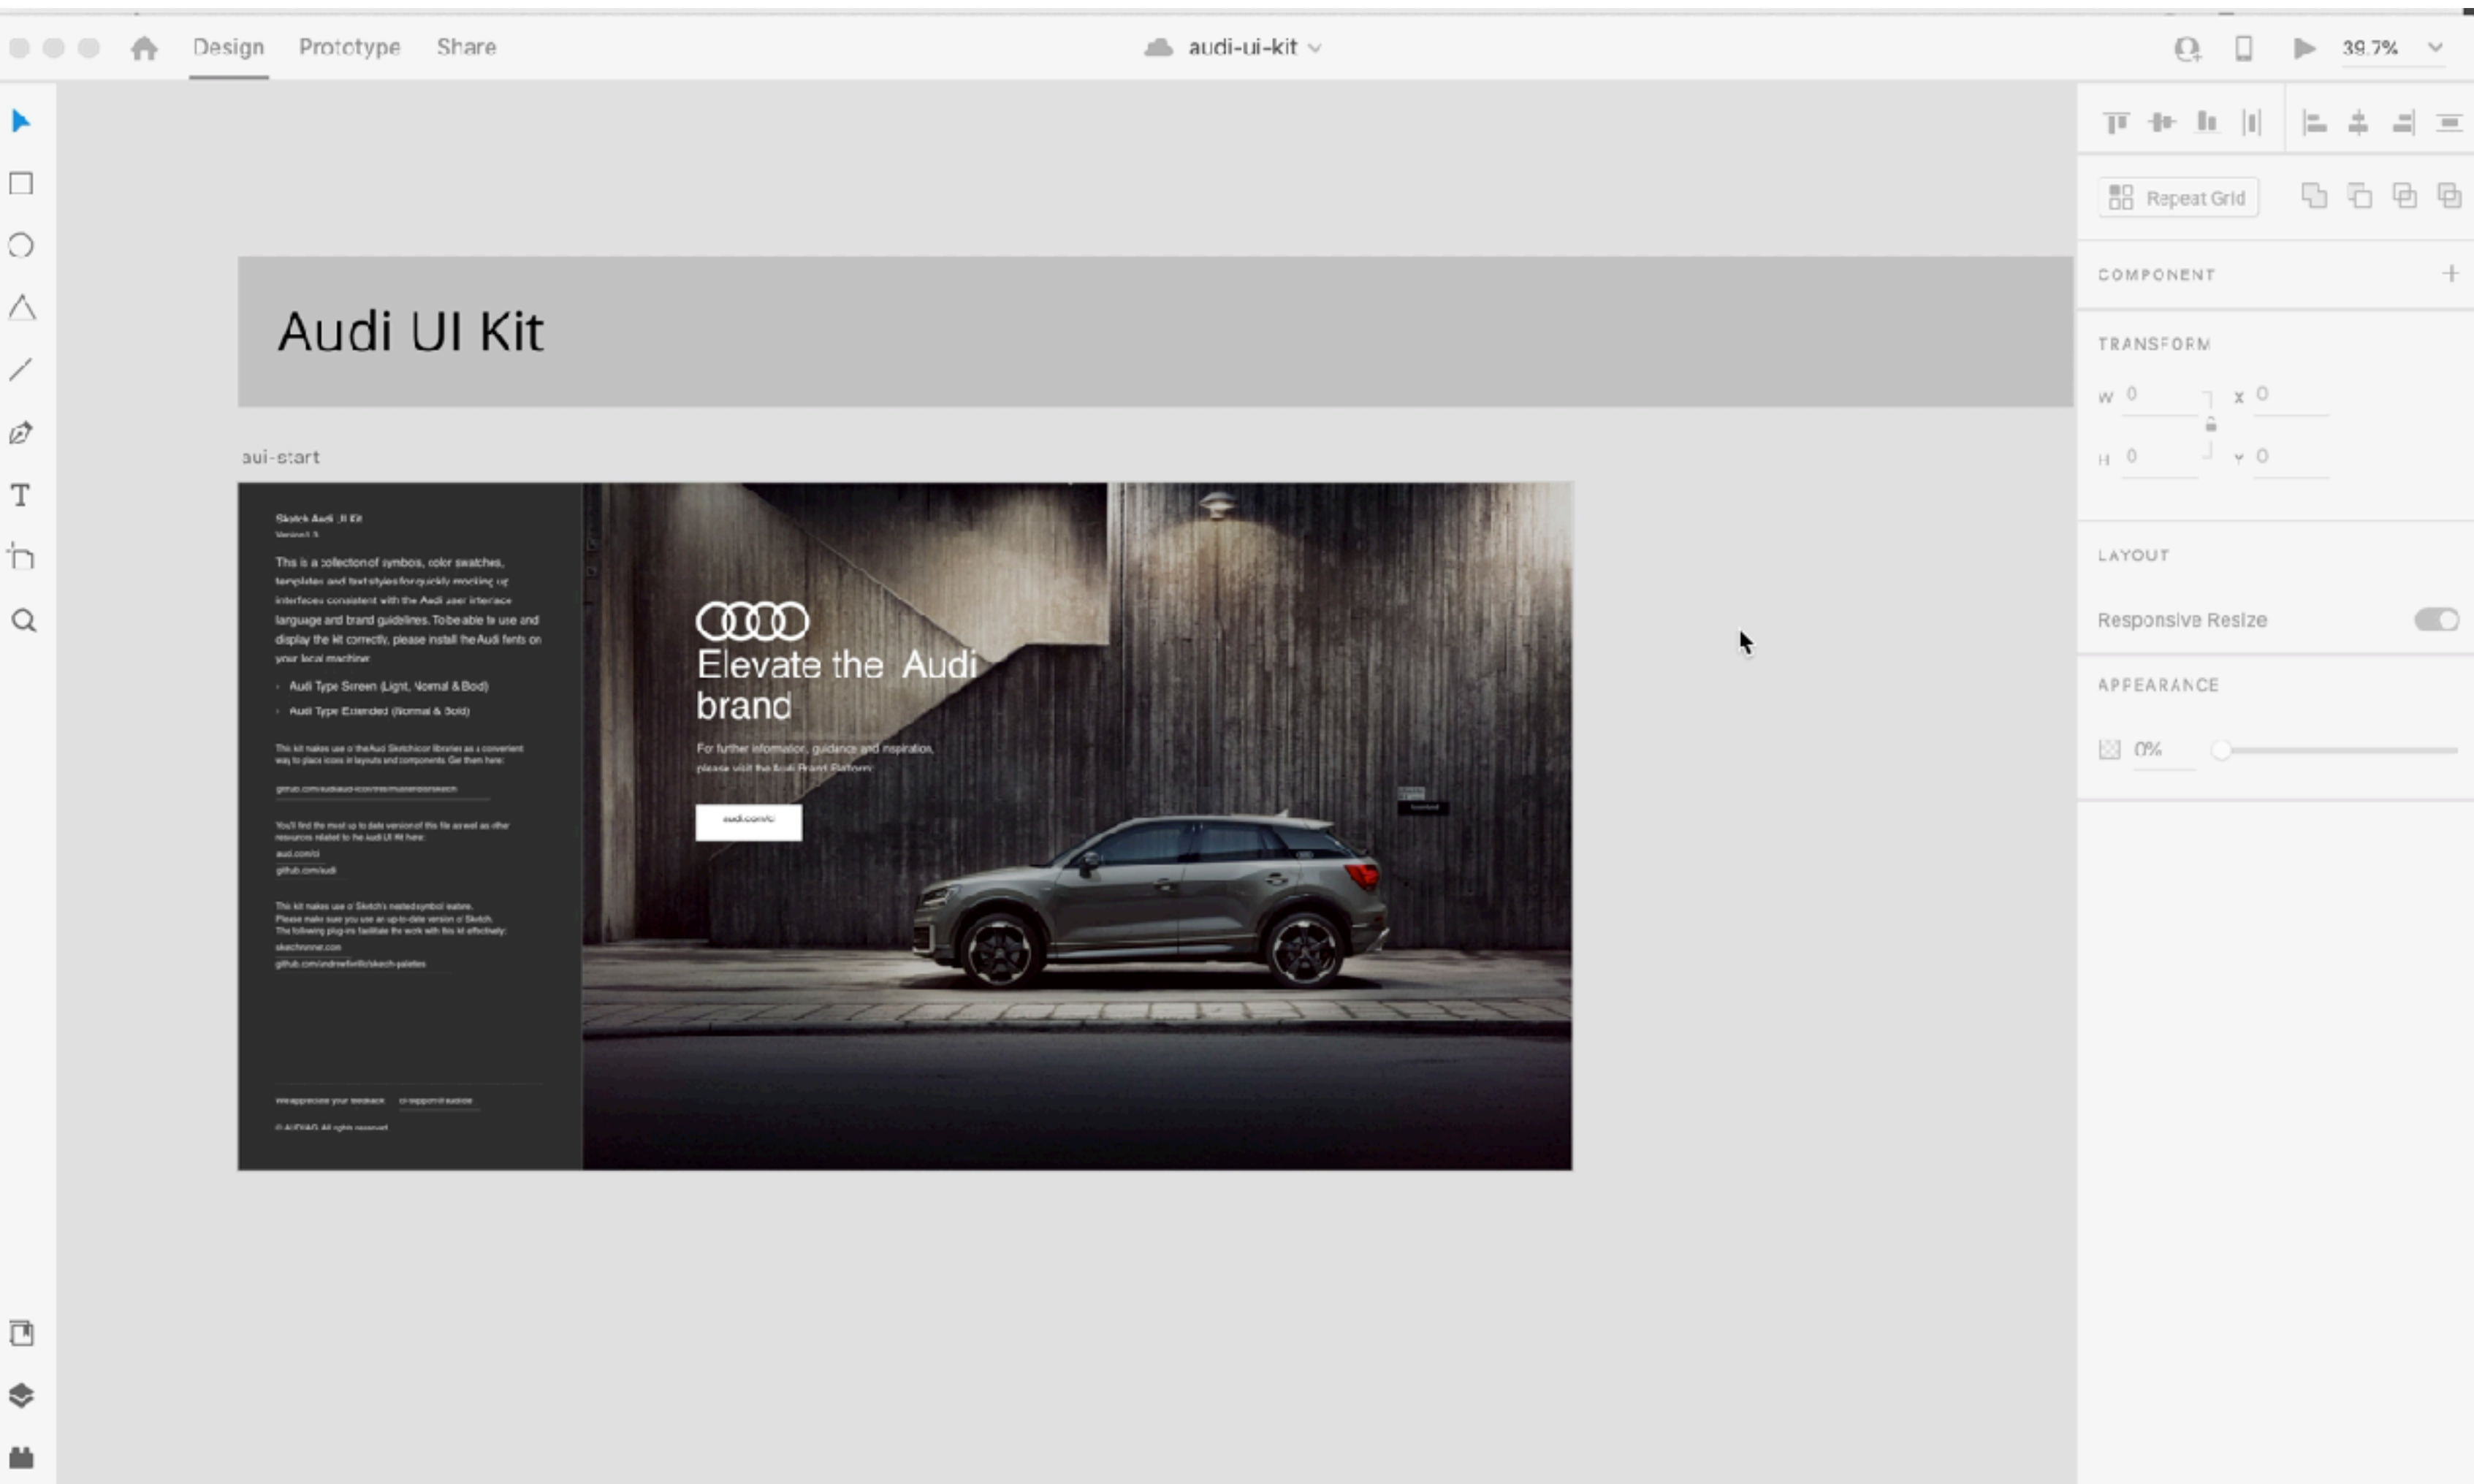

# Final submission: 2. Style Guide: Student examples

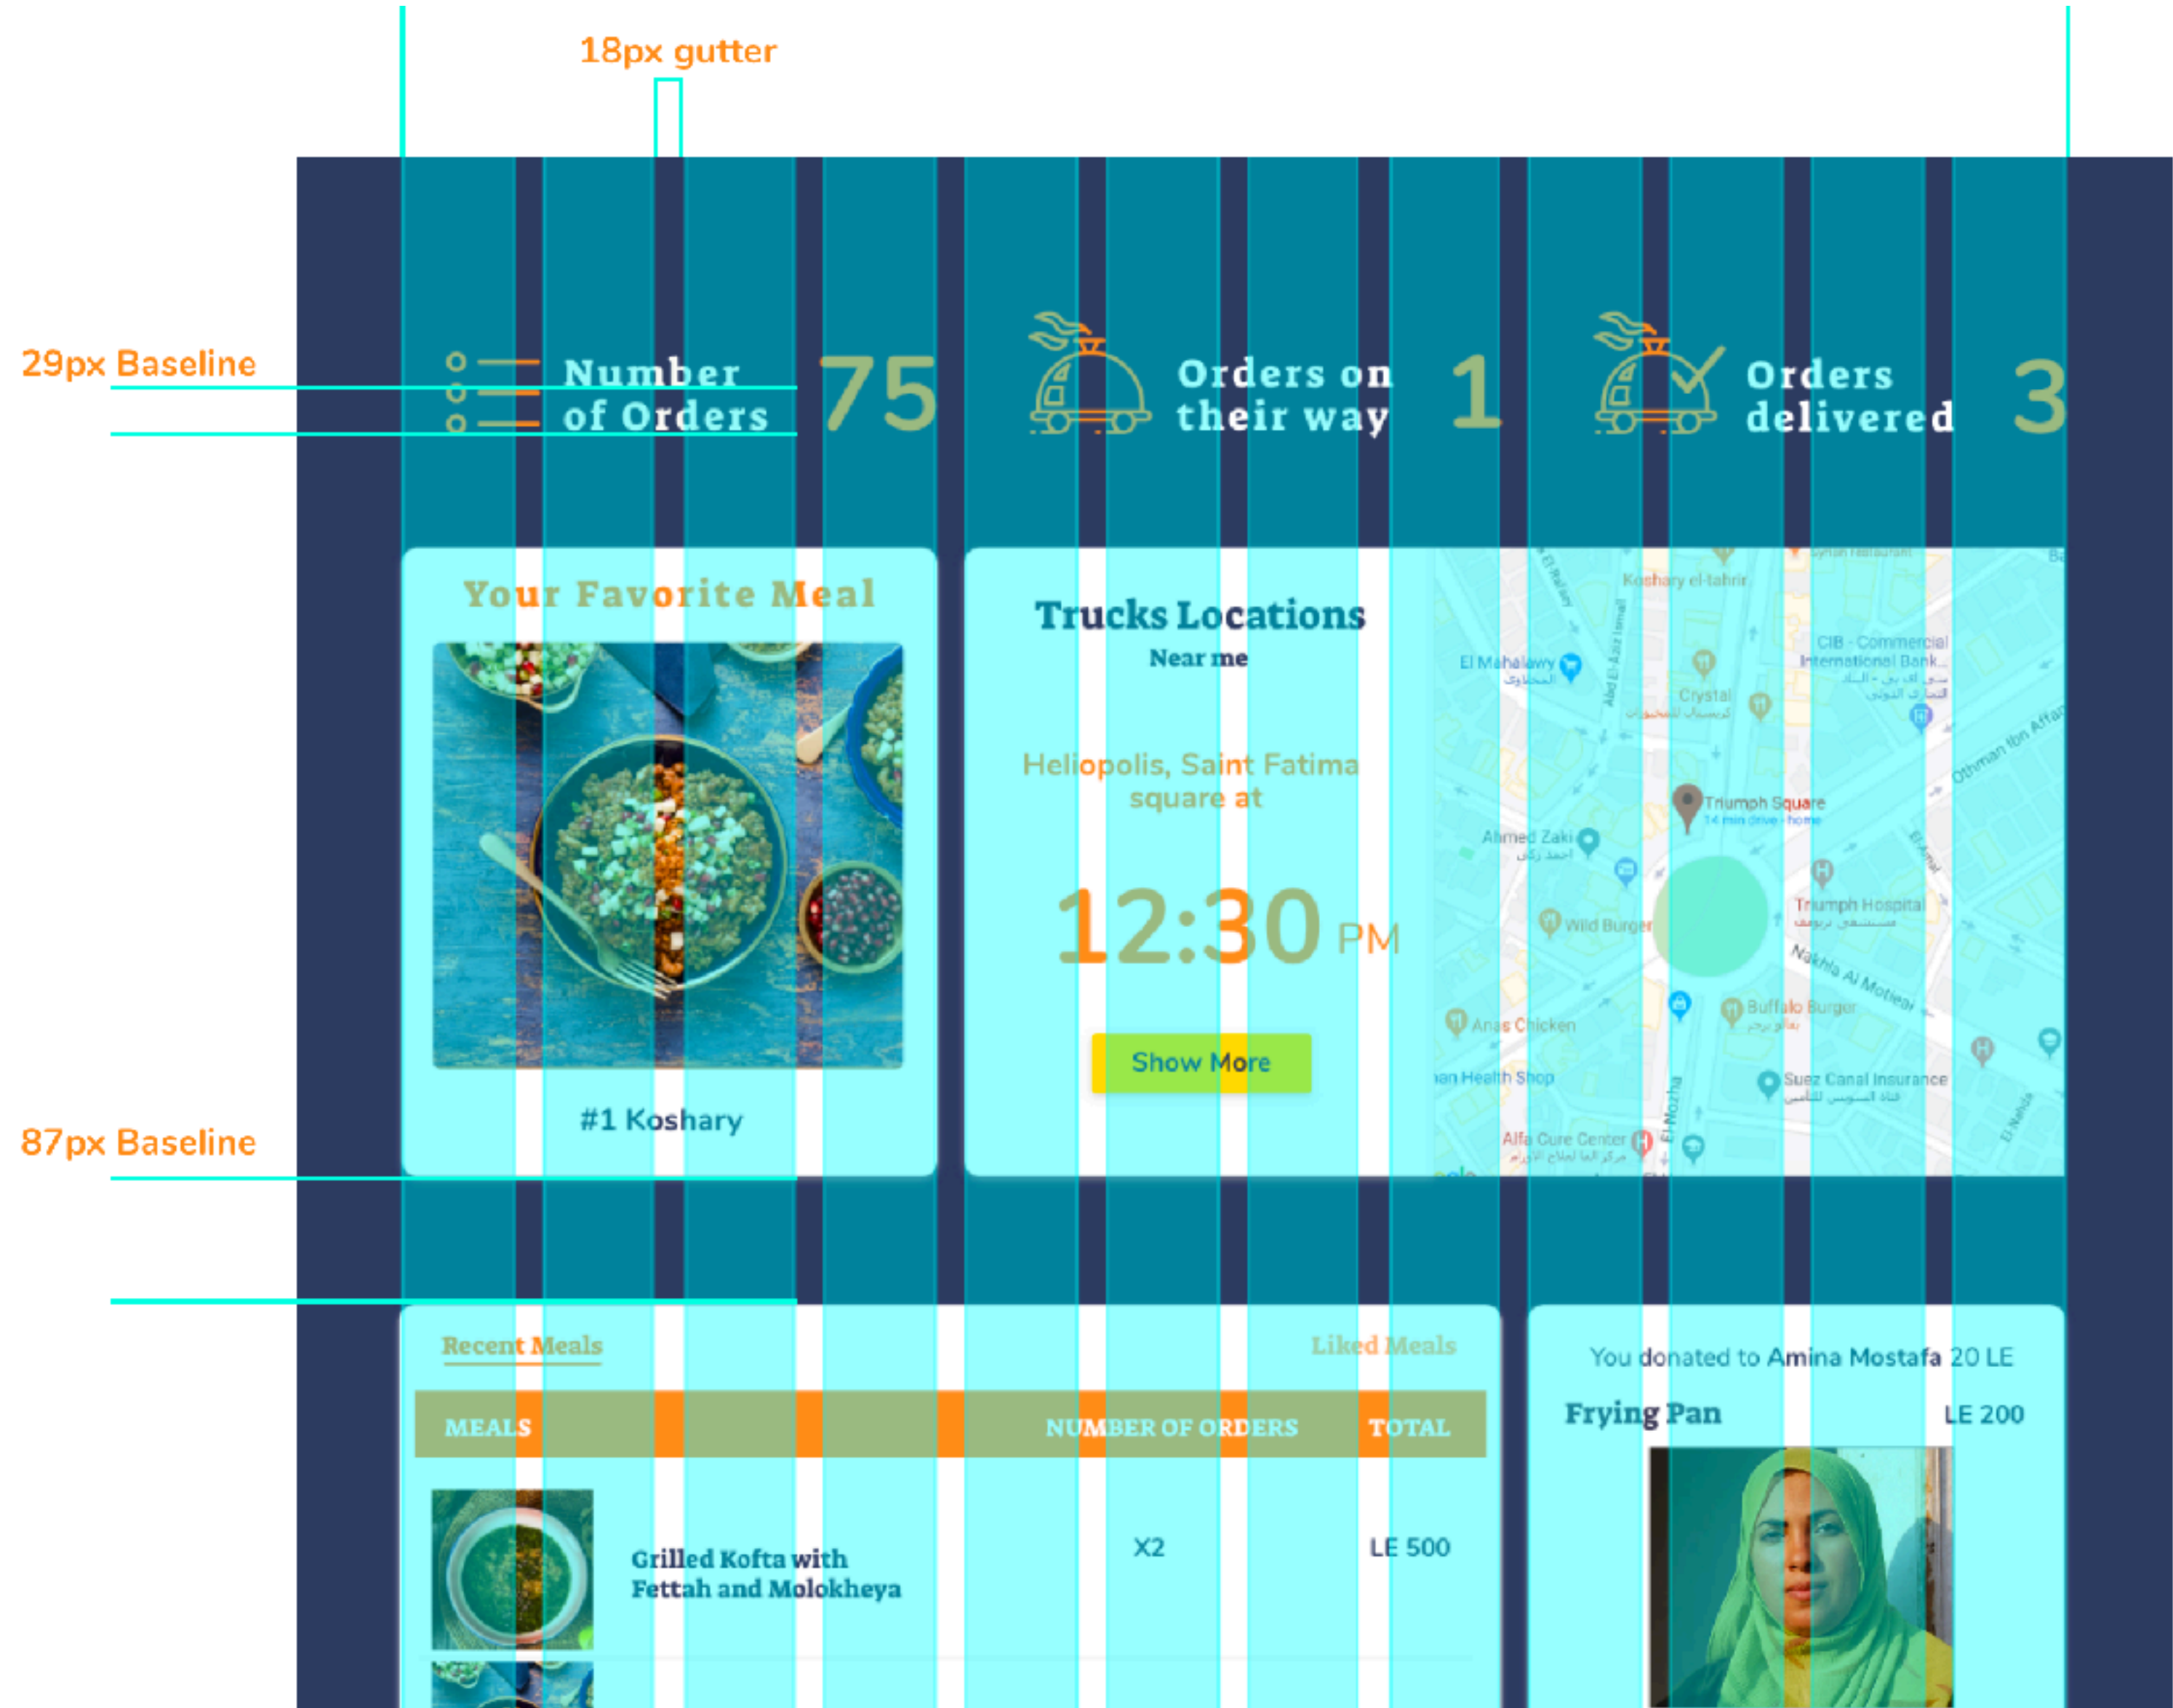

**!NOSH!**

## Take a look at the Audi UI Kit

# Final submission: 3. Responsive Dashboard in Figma

# Final submission: 4. One function each + midterm

# Final submission: 5. Stylescape in Figma

**Final submission equals 60% of your overall course grade! Graded out of 100, breakdown as follows:**

**20 Style guide:** Are all sections present, UI elements well designed, labelled clearly, easy to use?

**20 Concept + Usability:** Do functions and navigation work, are they complete?

**20 Animation:** Animated start page and animation in function pages (buttons, feedback popups etc)

**20 Graphical quality:** Overall visual language (stylescape) and application to website functions

**20 Technical quality:** Named functions, pages, components, styles, grid, responsive execution, well organized file. UI elements and text aligns to square/column grid. Correct grid used for website style.

# YOUR HOMEWORK H10

**Develop** all functions, dashboard, animated start-age, stylescape and style guide towards final submission

**Always use layout grid, baseline grid, character styles and components** so that you can adjust your website design quickly. (This is graded in the final too!)
